Pyramid project. Murals decorate interior of Russell family pyramid on nature preserve

This project is very interesting. I was commissioned by a family to decorate the interior of a pyramid . The structure is 12x12ft at the base and 16ft to the apex. vertically from the floor. The murals were painted with the keim paints on a fresh ,dried plaster coating in the interior of the pyramid. I designed the murals to reflect the natural landscape and animals that surrounds the site of the pyramid located on a natural preserve owned by the Russell family. There are four walls . Each wall represents a time of day and a season. The spring at dawn, summer at noon ,fall at sunset and winter at midnight.
